Professional Summary

Hands-on experience with SQL, Python, Power BI, and relational databases through academic and personal projects. Familiar with data extraction, cleaning, transformation, visualization, and analytical reporting to derive meaningful insights from data. Passionate about solving data-driven problems and continuously expanding knowledge of analytics, business intelligence, and data engineering concepts.

Education

Bachelor of Engineering (Information Technology)

2022 – 2026

Anantrao Pawar College of Engineering and Research (APCOER), Pune

CGPA: 8.50 / 10

Technical Skills

Programming Languages: Python, SQL

Data Analytics: Power BI, Data Analysis, Data Visualization, Data Cleaning

Databases: MySQL, Microsoft SQL Server

Tools & Concepts: Git, GitHub, ETL Fundamentals

Projects

Data Jobs Dashboard using Power BI

GitHub Repository

- Developed an interactive Power BI dashboard to analyze trends in the global data jobs market.
- Visualized job titles, salaries, employment types, experience levels, and geographical distributions.
- Created dynamic filters and drill-down functionality for detailed exploration of hiring trends and salary insights.
- Performed data transformation and cleaning using Power Query.
- Built visual reports to identify in-demand roles, salary distributions, and workforce trends.
- Technologies Used: Power BI, Power Query, Data Visualization

Sales Data Analysis using SQL

GitHub Repository

- Analyzed sales transactions to identify revenue trends, customer behavior, and key business performance metrics.
- Developed SQL queries using JOINS, CTEs, Window Functions, Aggregate Functions, Subqueries, and CASE statements.
- Performed revenue analysis by category, city, customer, and payment method.
- Generated analytical reports covering customer behavior, sales trends, and revenue distribution.
- Implemented running totals and advanced SQL-based business analysis techniques.
- Technologies Used: SQL, MySQL

Medibrief – AI-Powered Medical Report Summarization System

GitHub Repository

- Developed an AI-powered application to extract and summarize medical reports into concise, patient-friendly summaries.
- Processed and transformed extracted medical text to improve readability and support AI-based summarization.
- Stored report information and generated summaries in MySQL for efficient retrieval and management.
- Integrated a local Large Language Model using Ollama to generate summaries without relying on external APIs.
- Technologies Used: Python, MySQL, Ollama

Certifications

- SQL (Basic) – HackerRank
- SQL (Intermediate) – HackerRank
- Python (Basic) – HackerRank

Soft Skills

Analytical Thinking • Problem Solving • Communication • Teamwork • Adaptability • Continuous Learning
